IFQM Model of Operational Excellence

Achieve sustainable business growth and transformation by integrating data-driven decisions into leadership practices – enabling leaders to translate analytics into strategic insights, informed decisions, and organizational excellence.

Facilitator

Abhijit Deshmukh
(Professor Emeritus Purdue University)

Dr. Abhijit Deshmukh is a global expert in systems engineering, complexity science, and strategic decision-making. As the James J. Solberg Head and Tompkins Chair at Purdue University, he lead one of the world's top industrial engineering programs.

He has held leadership roles at Texas A&M University and the National Science Foundation, directing national initiatives in engineering and cyberinfrastructure. His research focuses on distributed decision-making, adaptive systems, healthcare policy, and digital infrastructure—key areas driving innovation in today's enterprises.

A fellow of the Institute of Industrial Engineers, Dr. Abhijit Deshmukh has received the NSF Director's Award for Collaborative Integration and multiple honors from professional societies. His work bridges academia and industry, offering executives forward-thinking strategies for navigating complexity and leading high-impact transformation.
